Run 9059f1b6ae · Generated Jul 15, 2026 16:00 UTC

How this was researched: The provider blocked automated access (an anti-bot or CAPTCHA check was shown instead of the page), so the product and price could not be verified automatically. A reviewer should open the page manually to confirm the details.

SUMMARY

The system was able to confirm that the 'Weighted blanket (therapeutic)' is not found on the OTPS exclusion list. However, the provider's website blocked automated checking, preventing verification of the product's existence and price electronically. A manual review of the webpage is required to confirm these details. Please note, the eight Internal Checks still need to be confirmed by a human.
